CHINMAYI RAMAKRISHNA

✆ +19452571850 | ✉ chinmayicr27@gmail.com | in linkedin.com/in/chinmayi-ramakrishna
San Francisco, CA

Education

The University of Texas at Dallas Aug 2024 – May 2026
Master of Science

National Institute of Technology Karnataka Jul 2018 – May 2022
Bachelor of Science

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, HTML, CSS
Developer Tools: Docker, Linux, Git, Postman
Technologies/Frameworks: React.js, React Native, Spring Boot, REST APIs, Microservices, Node.js, AWS (EC2, S3, DynamoDB), GCP, Kubernetes, Jenkins, Apache Airflow, MySQL, MongoDB, Apache Kafka, Splunk, Grafana, JIRA

Experience

Walmart Jul 2022 – Jun 2024
Software Engineer

- Engineered Spring Boot middleware APIs for Generative AI platform services, reducing security risks by 60%.
- Automated machine learning environment provisioning using TypeScript, Ansible, and GCP, decreasing setup time by 80%.
- Developed REST APIs for Spring Boot applications with CLI commands, enhancing ML environment reusability by 75%.
- Implemented caching in Spring Boot microservices, reducing ML model search time by 80%.
- Constructed centralized AI/ML catalog services and Python ETL pipelines for over 1,000 ML models.
- Collaborated on a cross-functional initiative to automate ServiceNow workflows, cutting manual effort by 50%.
- Engineered Jenkins CI/CD pipelines and Airflow workflows, boosting ML developer productivity by 50%.
- Monitored production health with Splunk/Grafana and debugged on Kubernetes, improving responsiveness by 50%.

John Deere Jun 2020 – Aug 2020
Software Engineer Intern

- Developed a cross-platform mobile application in React Native/Expo for customer acquisition, enhancing user experience by 60%.
- Secured user data in Amazon DynamoDB utilizing Okta authentication.

Microsoft Jun 2019 – Aug 2019
Software Engineer Intern

- Engineered an AI game opponent using the minimax algorithm (3 difficulty levels) in React.
- Selected from over 200 candidates, receiving positive usability feedback from more than 100 student testers.

Projects

Agentic AI Enabled CI CD Pipeline| DevOps

- Developed a Pipeline Copilot Agent that checks deployment signals and suggests subsequent actions.
- Constructed a Go-based CI/CD pipeline project utilizing Docker and Kubernetes for automated build and deployment.

Object Detection & Robotics Integration| YOLOv11 OBB

- Annotated a dataset of 922 images (20% augmentation) and trained a YOLOv11 OBB model on over 5,000 images.
- Achieved 85% precision/recall across 8 classes.

Real-Time Stock Data Streaming| Data Engineering Pipeline

- Containerized Apache Kafka and Zookeeper on AWS EC2 using Docker.
- Automated deployment via Jenkins CI/CD with AWS S3 storage and Postman API validation.
